

MultiCom Software Oy

MultiCom Software is recognized as one of the leading Finnish data protection and archiving specialist organisation. We create highly tailored and customer oriented solutions which fulfill the most stringent customer requirements.

Backup and digital archiving solutions have been the core expertise of the company for over two decades. We have implemented hundreds of solutions for our customers with top class feedback and satisfaction. An In-depth understanding about the customer's core processes along with a wide area of experience of different vendors' solutions enables us to provide turnkey solutions with the best possible technologies and products.

MultiCom operates and partners with multiple market leading vendors, such as

- ▶ CommVault – Data Platform
- ▶ DELL – Storage and Data Protection Solutions
- ▶ EMC (for example Avamar, Data Domain, Networker, SourceOne)
- ▶ Fujitsu – Eternus, CentricStor
- ▶ Hitachi Data Systems (for example Hitachi Content Platform and Hitachi Data Protection Suite)
- ▶ NovaStor (for example Hiback NovaBACKUP DataCenter)
- ▶ Oracle (for example StorageTek Technologies and HSM Archiving)
- ▶ Veritas (for example NetBackup, BackupExec, DataInsight and Enterprise Vault)
- ▶ Typical hardware partners include but are not limited to Dell, EMC, HDS and Oracle StorageTek

The largest backup environment delivered by MultiCom manages more than 11 000 servers and over 20 petabytes (monthly backup volume). We have also delivered data protection solutions for most of the largest Finnish service providers.

The largest archiving solutions delivered by MultiCom supports over 15 000 users or over 300 million objects. Typical archiving solutions are built for Exchange, File, Notes and SharePoint environments and frequently include the complete data management infrastructure (backup, DR).

MultiCom specialists have over 20 years of experience in backup and archiving projects and have more than 100 certifications related to the vendor offerings. We also partner and network with the content archiving market leaders.

MultiCom also provides strong expertise and offerings in the following areas;

- ▶ Backup Analysis and Planning
- ▶ System Deliveries, Solutions and Migrations
- ▶ Service Maintenance and Management per customer needs
- ▶ Data Protection as a Service (DPaaS)
